Haiti National Water, Sanitation
and Hygiene Initiative

Presentation to HANWASH Board on new Indicator Framework

*By: Tristam Johnson, M&E Subcommittee Chair at HANWASH
& Alex BONHOMME, M&E Manager at HANWASH*

September 18, 2025

HANWASH

Rotary-inspired and Rotarian-led.

Rotary
District 7020

Objectives of this presentation?

- Presentation of the challenges associated with the current indicator framework used to measure results & impact
- Proposal of a new, simplified, locally-led & result-oriented indicator framework

I) Presentation of the challenges associated with the current indicator framework

Challenges with the current indicator framework:

- Overload of indicators (56 *indicators to be measured*)
- Indicators are detail-oriented instead of being result-oriented
- No practical local ownership for indicators measurement
- Indicators are overly-complicated and not user-friendly

What we want to measure

Universal access to safe, sustainable and affordable WASH services in Haiti

OUTCOME 1 (Demand):

Strengthened demand for and management of WASH services in the intervention communes

OUTCOME 2 (Supply):

Expanded household access to and use of sustainable, affordable, and safe water, sanitation and hygiene services

OUTCOME 3 (Collective action & scaling up impact):

Strengthened WASH governance and expanded reach through collective action

Citizens/subscribers from the community of Karoline & Laveng, in Cavaillon getting drinking water from water points managed by CPEs

II) Proposal of a new, locally-led & result-oriented indicator framework

Key characteristics of the new indicator framework :

- A manageable number of indicators (*only 20 indicators to be measured*)
- Indicators are result-oriented instead of being detail-oriented (*prioritization of outcome/result indicators & use of data collection tools to track activities & outputs*)
- Local ownership for data collection & indicators measurement (*through engagement of 6 stakeholder groups*)

Indicators to measure outcome 1: Strengthened demand for and management of WASH services in the intervention communes

Progress or Performance Monitor	Indicators showing Progress towards Goals	Who collect the data
Increased civil society engagement in decision making and implementation of WASH services.	1) % of municipal WASH events with Haitian Rotarian participation	Host Rotary Clubs & Mayors
	2) % of water point committees (CPEs) and Professional Operators created which are functional	Mayors
	3) % of intervention communities that achieved ODF status using the CLTS approach	Mayors
	4) % of population in intervention communities paying for water service	CPEs & Implementing partners
Improved commune WASH planning and coordination by local authorities.	5) % of municipal WASH interventions implemented in alignment with the Commune Action Plan	Mayors
	6) % of the intervention communes with functional WASH municipal committee	Mayors & Municipal Committees
Improved accountability of service providers to users of WASH services.	7) % of service providers monitored according to DINEPA/OREPA guidelines as accepted by the Mayor's Office	OREPAs
	9) % of customers satisfied with the quality, affordability and reliability of the WASH services provided	Municipal Committees & Host Rotary Clubs
	10) % of communes which have held an annual WASH service provider review with key stakeholders in the last year	Municipal Committee & OREPAs & Host Rotary Clubs

Indicators to measure outcome 2: Expanded household access to and use of sustainable, affordable, and safe water, sanitation and hygiene services

Progress or Performance Monitor	Indicators showing Progress towards Goals	Who collect the data
Expanded household access to sustainable, affordable, and safe drinking water services.	1) % of population in intervention communes with access to basic drinking water service	Municipal Committee & Host Rotary Club & OREPA
	2) % of population in intervention communes with access to safely managed drinking water service	Municipal Committee & Host Rotary Club & OREPA
	3) % of intervention water points and water systems which are functional, potable, and have at least a balanced budget after 2 years	Municipal Committee & OREPA & Host Rotary Clubs
Expanded household access to sustainable, affordable, and safe sanitation services.	4) % of population in intervention communes with at least basic sanitation service	Municipal Committee & OREPA & Host Rotary Clubs
Expanded household access to hygiene services.	5) % of population in intervention communes with at least basic hygiene service	Municipal Committee & Host Rotary Clubs
Expanded access to safe, affordable and sustainable drinking water, sanitation, and hygiene services in healthcare facilities and schools	6) % of schools with at least basic drinking water, sanitation, and hygiene services	Municipal Committee & Host Rotary Clubs
	7) % of healthcare facilities with at least basic drinking water, sanitation, and hygiene services	Municipal Committee & Host Rotary Clubs

Indicators to measure outcome 3: Strengthened WASH governance and expanded reach through collective action

Progress or Performance Monitor	Indicators showing Progress towards Goals	Who collect the data
Increased government and non-government funding in alignment with HANWASH Core Values.	1) # of partnerships made in alignment with HANWASH core values	In-Country Director
	2) Cumulative amount of money invested in alignment with HANWASH Core Values	In-Country Director

- Indicators related to outcome 3 here are not locally-led, but can be used as performance indicators for the In-Country Director.
