en Help Not logged in

The screenshot shows the 'Login to mWater' page. At the top, there is a navigation bar with links for 'Sites', 'Surveys', 'Visualizations', 'Manage', and 'Indicators'. On the right side of the header, there are language ('en'), help ('Help'), and user status ('Not logged in') buttons. The main content area is titled 'Login to mWater'. It contains fields for 'Username or Email' (with 'Username' and 'Forgot Password?' sub-fields) and 'Password' (with 'Password' and 'Forgot Password?' sub-fields). There is also a 'Save login' checkbox. A large blue 'Login' button is centered below these fields. Below the login form, a horizontal line with the text 'Or' in the center leads to a 'Signup' button. The entire login form is highlighted with a thick orange border, and an orange arrow points from the text 'Saisissez vos informations d'identification et cliquez sur le bouton « Login ».' to the 'Login' button.

News

[Who else is using the platform where you work?](#)

Do you want to get a sense of which organizations are active in a country you are working in? Take a look at this dashboard. The data is based on site information that those organizations have chosen to make publicly visible.

[Custom dashboard layouts](#)

Thanks to funding from World Vision we have developed an extensive set of style customization options which you can use to adjust the way your dashboards look. Go to the Layout tab of a dashboard you manage to explore these options.

[The USAID STAWI MIS Project in Kenya's ASAL Regions](#)

As part of USAID STAWI, mWater is creating tailored MIS for nine counties in Kenya by centralizing water infrastructure data, conducting comprehensive surveys, and collaborating with local stakeholders to enhance water service delivery and data management.

URL LINK :
<http://go.mwater.co/hanwash>

The screenshot shows the HANWASH Home console interface. At the top, there is a navigation bar with links for 'mWater', 'Data', 'Surveys', 'Visualizations', 'Merge', and 'Indicators'. Below the navigation bar, there is a header with the HANWASH logo and the text 'HANWASH Haiti National Water, Sanitation and Hygiene Initiative'. The main content area is divided into several sections for different communes: HANWASH Overall Performance, Cavaillon, Ferrier, Léogâne, Pignon, and Terre-Neuve. Each section contains links to 'Community Action Plan', 'Performance Indicators', 'Project Status', 'Investment Status', 'Lessons Learned', and 'M&E system'. Below these sections, there is a note: '* This console is currently under review with design update and data quality check.' At the bottom of the page, there are sections for 'What is HANWASH?', 'Vision', 'Mission', and a footer note: 'Universal sustainable access to safe drinking water, sanitation and promotion of good hygiene practices throughout Haiti.'

ACCÉDER AU CAP CONSOLES

Nous veillons à ce que le plan d'action communal (CAP) soit disponible pour chaque municipalité. Il est également disponible dans la petite fenêtre de performance globale. Sélectionnez celle qui vous intéresse.

The screenshot shows the HANWASH mWater platform interface. At the top, there is a navigation bar with links for 'mWater', 'Sites', 'Surveys', 'Visualizations', 'Manage', and 'Indicators'. Below the navigation bar, the HANWASH logo and name are displayed. The main content area features a large blue water drop icon and the text 'HANWASH Haiti National Water, Sanitation and Hygiene Initiative'. Below this, there are six boxes representing different municipalities: Cavaillon, Ferrier, Léogâne, Pignon, and Terre Neuve. Each box contains a 'Commune Action Plan' link, which is highlighted with an orange box and an arrow pointing to the text 'Nous veillons à ce que le plan d'action communal (CAP) soit disponible pour chaque municipalité. Il est également disponible dans la petite fenêtre de performance globale. Sélectionnez celle qui vous intéresse.' (We ensure that the Commune Action Plan (CAP) is available for each municipality. It is also available in the small global performance window. Select the one that interests you.)

What is HANWASH?

Created in 2018, HANWASH is a national program established through a collaborative effort between Rotary International District 7020 and the National Directorate for Water Supply and Sanitation (DINEPA). Building upon the WASH implementation model developed by the non-governmental organization Haiti Outreach, HANWASH serves as a platform for bringing together both local and international partners. This collaboration aims to facilitate the transfer of knowledge and skills while empowering local communities and leaders to effectively govern WASH initiatives. HANWASH's goal is an "increased access to safe, sustainable and affordable water, sanitation and hygiene (WASH) services in Haiti".

Working with a variety of partners, HANWASH investments are made according to national policies, international good practices in the WASH sector, and a set of core values which are: local leadership, meaningful collaboration with our partners and volunteers, thoughtful planning and continuous improvement, sustainable impact and long-term commitment.

Vision

Universal sustainable access to safe drinking water, sanitation and promotion of good hygiene practices throughout Haiti.

Mission

Develop and implement business-based best practices for public and private collaborations to build capacity in local communities to deliver drinking water and sanitation to all citizens of Haiti

VUE D'ENSEMBLE DE LA CONSOLE

Nous avons trois pages dans la console. Nous concentrons intentionnellement cette présentation sur la page CAP. Nous avons ces sections dans la page :

- CAP MAP
- # Nombre d'interventions par type de Wash Focus, d'intervention et d'infrastructure (planifié)
- # Nombre d'interventions par état de mise en œuvre
- % de la population ayant un accès de base aux services WASH (base de référence vs projeté vs actuel)

CAP: All WASH Focus: All Interventions Type: All Infrastructures Type: All

Commune Action Plans (CAP):

This console displays all the WASH activities planned for each intervention commune of HANWASH. It also helps in the tracking of progress by disaggregating the interventions by their implementation status (planned, in-process, completed successfully), and also by comparing the Baseline value VS the Projected value VS the Current value for each WASH area (Water, Sanitation, Hygiene) for each intervention commune in terms of the % of the population with access to services. The CAP is locally led, which means it has been created in conjunction with the Local Authorities, DINEPA representatives and other HANWASH partners, such as Haiti Outreach and MAGEPA.

N.B: Data entry is underway for the Leogane CAP. This explains the limited amount of interventions displayed.

Demographics:

- # of Household: ...
- # of People: ...

Source: Estimate of the population conducted by IHSI in 2015.

4. % of population with basic access to WASH services (Baseline vs Projected)

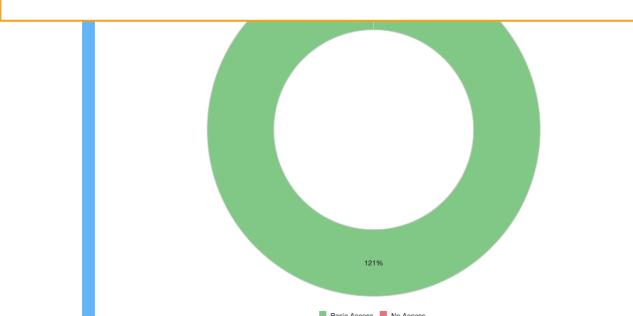

Baseline - Access

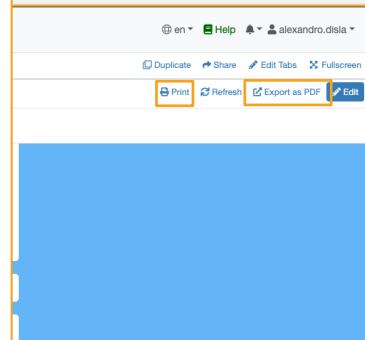

60%
Basic Access
No Access

N'oubliez pas que les filtres rapides doivent être actifs. Pour que la console affiche les résultats.

L'impression (print) et l'exportation au format pdf sont les deux méthodes standard pour exporter les résultats de la console au format pdf. Cependant, l'exportation au format pdf est recommandée en raison de son efficacité.

	The commune's demographics and the basic water access							
	Total		Baseline			Projected		
	Households (HH)	People (PPL)	No Access		Access			
All	11,371	48,687
Commune								
Cavallion	11,371	48,687
